

PAULA MARONESE
INDUSTRIAL DESIGNER
UX/UI DESIGNER

APPLICATION FOR: UX/UI

To the team at CELUS:

As a detail-oriented individual with exceptional multitasking and time management skills, I am pleased to be submitting my application for the **UX/UI** job within CELUS, which has been posted in LinkedIn.

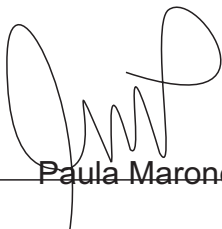

Possessing the **Industrial Designer Degree** from the National University of Mar del Plata (Argentina), and the **UI/UX Certification** from the CareerFoundry Institute (Germany) where I have been involved in various projects of UI development for web, desktop, and mobile applications, HTML, CSS and JavaScript.

As an industrial design student, I learned about the analysis of each and every point in a company's supply chain, from sourcing and ordering raw materials to the distribution of goods to end consumers identifying innovative approaches and improved solutions.

Observation, inspiration, and determination are my foundation for success. My philosophy is that introducing fresh perspectives and new techniques allow businesses to evolve and grow, that is the reason why I moved to a country with a vision of the future, and expanded my studies to the area of UX / UI, making these go deeper in the area of user experience (both in product and graphics) and of mobile applications.

For a greater presentation of my background and qualifications, please review my attached resume. I am eager to speak with you and greatly appreciate your consideration. I can be reached at (+49) 1512 83 90001 or via email paula.maronese@gmail.com

Sincerely,

Paula Maronese
